If you want to prolong the life of your fumace and pipes many years have it thoroughly clean-ed, as only a modern fumace Vacuum Cleaners in the hands of experienced mechanics can do

The combination of soot and moisture ex-

isting in the furnace in the Summer creates a chemical condition that can do it more damage in one Summer than many seasons of heating.

Our Modern Vacuum Cleaner cleans the flues, smoke pipes, ashpit, chimney, warm air and cold air pipes, registers, radiators and all the parts that can't be reached by hand cleaning.

The Fuel Situation **Up To Date**

The HE and of another coal burning year is rapidly approaching. During that year we were favoured with a business than for some years post from all our loyal customers of long standing, as well as from a great y walcome new customers. O

We wish to take this opportunity to express to all, our great appreciation of the display of confidence in we our alecter thanks for entrusting to us your feel orders; we trust we have, by the service rendered, merited seval for the coming your of your valued partnages.

The pest year, the accord year of the war, has brought many new developments into the lives of all of us, development not of a phosonal nature, but of a lind enforcing curtailments, sacrifices and horder work which we all have chertaily enhanced and which, when they become more deating, can they surely with life dis peach, ness on the part of all to accept, as each not's shown, in assisting as best we can to promote our war offert and to help win the war.

Our cantibution to this effort has been and will continue to be a continuion that we here a definite repossibility in the cond-consuming public—industries, hospitals, school, Genements Institutions, business establishments and all householders and a reducibiling of our efforts to make armagements will in advance with the sources of supply which have a swall fooked after us in the part, to provide as with the very large tensage of high grade feat which must come to us by both rail and boat, to fill the requirements of all our customers for the coming year; AND TO SEE THAT SUCH AREARGEMENTS ARE CAREER OUT.

The principal difficulty in carrying not this program is the abstrage of boots, an easy herita been taken out of commercial uses in the lower flower, for the Greenment var service. Howevers, we shell then as a result of arrangements we have already mede, this difficulty will be largely erectome, and with the same co-operation our customers have given us in the part, by placing that contracts with a when we indicate to them the appearance time to act, we are confident we will be able to take a care of every one of our customers a hundred per cast, as we did during the part year.

The foregoing applies to American Anthracite and Bituminous coah. Regarding Welsh and Scotch portations, from information which we have received from the importers, we are to expect, due to uncerbading conditions on the Athentic, these shipments will be gently curialled this year, sepacitly in the dominations of Welsh and Scotch, but a reasonable towneys will be forthcoming of Buckwheet sizes for Blower

The Fuel Administrator's Division of the Wortime Prices and Trade Board, Ottown, has recently sent out be all coal dester a letter urgently recommending declers to stock coal as early and in an large quantities as possible, due to the existing uncertain coalditions, it being very evident coal producers and the railways will have ungedictable burdens in the coming year.

We think this recommendation is a very wise one and we are acting upon it; we in turn strongly declare that twil users would be well advised to place their orders early—commencing Mey 1st. As the fuel question is one of such outstanding importance to all, we felt this would be an opportune time as along such information as we have available on the subject, with the hope that it may prove timely und of general interest.

Patriotic SERVICE

Saving money at this time becomes a patriotic service, as well as a personal benefit to the saver. In order to meet the national needs, everyone will have to make sacrifices, and systematic saving makes these objectives

You will have larger taxes than ever before. Save regularly in a savings account to be able to pay those taxes when they fall due.

You will want to buy war securities to help our forces: Save regularly to build up a fund for future buying.

You will want to provide against possible personal and family adversity in the future, to be self-supporting and financially independent: Save regularly in a savings account.

Yes, YOU BOYS AND GIRLS can help win the War!

What Ji you can't fly a bomber, or drive a task, or help make gues and ammunition? You can do you part in winning the war. When you boys go out and out lawss or collect paper and earn, you are doing a man's work. That releases one more man often the armed forces or to work in a sami-tions plant. When you go up to the store and sho relieves tarched and make more time and guoline available for carrying on the war. When you git it was the dishes and hip-

Pte. D. E. Neff, of Detroit, shows where he would like to use his axe. U.S. army engineers keep their sense of humor as they blaze trail through 1,200 miles of bleak Canadian wilderness to build vital military highway from the border to Alsaka.

Trains runt trucks and road-making machinery to the end of steel at Dawson Creek. Below, tons of supplies of all kinds are unloaded. Soldiers to laugh when they found complete quota of Christmas tree decorations, presumably for next winter.

Leon Arfa, Chicago, gives his autograph to Frances Berg, of Beaver Lodge, Alta. People of tiny northern towns welcome visitors, like their breesy informality.

Speed is first consideration. Canadian truckers on 36-hour run from Dawson Creek to Fort Nelson live in trucks. Drivers relieve each other every 10 hours, aleep in coffin-like boxes. Aside from trucking no civilian labor is needed on this job.

Typical of the hard-fisted, corner-cutting American engineers is Pte. Felix Murawski. of Oklahoma City. He glares cheerful defiance at stubborn bush country.

Headquarters of U.S. army in Canada is the 5 and 10-cent store in Dawson Creek.
The new road runs through Edmonton, Dawson Creek, Fort St. John, Fort Nelson,
Watson Lake, Whitehorse to the Alaskan boundary. Canada built airports along route.

Under expert hands buildozers, caterpillars, graders and drag lines carve out the narrow pilot road which will later be widened and sufaced. Snow was light

this year but temperatures were 30 to 50 below sero. Men live in tents, but are furnished artic clothing. Surveyors use dog teams to take instruments into north.

Across the frozen Peace River a plank highway is laid to carry heavily-laden trucks at a wary pace of three miles an hour. After the sprins thaw a stout ferry

will be used. Over lesser rivers pontoon bridges will be built. Regardless of weather, natural obstacles or human_failings_the relentless drive presses northward. Phous to Herry Round, D.P.I.

TELEPHONES are in greater de-mand than ever before—even greater than in 1941, an all-time record year. By far the greater part of this demand is for residence

Only a part of this unprecedented volume of orders can be filled if we are to have anything left for the camps and depots and air schools of our armed forces-for the plants and offices of our war industries. Already telephone materials are difficult to obtain. Reserves are steadily diminishing, even though we are re-conditioning and re-using every last piece of equipment that can be salvaged.

There can be only one answer: war needs must get first call on available supplies. Even when necessity demands new installations, not all types of instruments and services will be available.

The Wartime Prices and Trade Board established by the Governor-in-Council under the War Measures Act, has directed us "to do all such things as may be requisite to conserve any and all telephone plant and facilities?

We realize that this will cause inconvenience—perhaps even hard-ship. We shall need your help in working out wise and just solutions to the telephone problems of your community. And we know that you will give it cheerfully, as still another necessary contribution to victory.

The Fuel Situation **Up To Date**

The end of another coal burning yeer is repidly approaching. During that yeer we were feroured with nore business than for onto years past from all our loyal customers of long standing, as well as from a great neary velcome new customers.

We wish to take this opportunity to express to all, our great appreciation of the display of confidence in us and our sincers thanks for entrusting to us your full orders; we trust we have, by the service rendered, merited a renewal for the coming year of your valued potentiage.

The post year, the second year of the war, has brought many new developments into the lives of all of us, development not of a pleasant nature, but of a kind enfecting cardillanants, secrifices and horder work which we all have chertailly embraced and which, when they become more details, as they surely will, will find a readiness on the port of all to accept, as each one's shore, in quisting as best we can to promote our war effort and to shop in the war.

Our contribution to this affort has been and will continue to be a realisation that we have a definite responsibility to the con-lecensuming public—industries, hospitals, schools, Government institutions, business exhibitionests and all hospitableters and a redealing of our afforts to suche arrangements will indexence with a source of supply which have so well looked after us in the part, to provide us with the vary large tenange of high spaces for such that the same part of the provide such that the same part of high supply such as the part of the same part. AND TO SET THAT SUCH ARRANGEMENTS ARE CARRIED OUT,

The principal difficulty is carrying out this program is the abortogo of boots, so many having been taken out of commercial use on the lover lakes, for the Government we service. However, we feel that as a result of arrangements we have already made, that difficulty will be largely overnome, and with the same co-position or currently many parts in its the past, by placing that cohiracts with us when we indicate to them the appearance that the past, by placing that cohiracts with us when we indicate to them the appearance that the past, by a service of the past past, as are confident we will be able to take care of every one of our customers a hundred per cent, as we did during the past year.

The foregoing applies to American Anthrecits and Situminous costs. Reperting Welsh and Scotch importations, from information which we have received from the important, or to support, due to successful beauting conditions on the Affestic News Signature with the proof profit file proof and the support of the proof of the proof of the support of the proof of the proof of the proof of the support of the proof of the proof

The Fail Administrator's Dirision of the Wartime Fricas and Trade Board, Ottows, has recently sent out to all coal dealers a latter urganity recommending dealers to stock coal as early and in as large quantities as possible, due to the existing uncertain coaditions, it being very evident coal producers and the reliverys will here unpredictable bordens in the coming year.

We think this recommendation is a very wise one and we are acting upon it; we in turn strongly declare that us! users would be well advised to place their orders early—commencing May 1st.

As the fuel question is one of such outstanding importance to all, we (all this would be an opportune time to gaus along such information as we have available on the subject, with the hope shat it may prove timely and of general interest.

LOYAL CITIZENS DO NOT HOARD!

Hoarders are people who buy and store away goods beyond their immediate needs.

They want to be in an unfair position over their neighbors.

Hoarders are traitors to their country and their fellow citizens, because by creating excessive and unnecessary demands for goods, they slow down the war effort.

There is no excuse for "panic buying" and hoarding. Everyone will have enough, if no one tries to get more than a fair share.

Hoarding must stop! Every unnecessary purchase makes it more difficult for Canada to do a full war job.

THERE'S A LAW AGAINST HOARDING

It is against the law to buy more than current needs. Violation of the law is punishable by fines up to \$5,000, and imprisonment for as long as two years.

AVOID ALL UNNECESSARY BUYING — AVOID WASTE MAKE EVERYTHING LAST THE LONGEST TIME POSSIBLE

such as your next season's coal supply—you will be encouraged to do so by direct statement from responsible officials.

M ANY of the materials that go to make a CCM. Bicycle and the identical machines which convert them are the same type of materials and the identical machines we are using to produce war supplies—war supplies that are vital to John Bull to help him "finish the Joh." Naturally, then, we are not making so many hitycles.

We are rigidly maintaining, however, the established high standard of C.C.M. quality and C.C.M. accuracy in the making of every last bicycle for which we can obtain material.

Not only are we maintaining quality and accuracy, but we are gaining a great new wealth of manufacturing experience and learning new methods, processes and of new materials that will be passed on to you in the CCM. Bicycles of the future which we will make when "Peace breaks out again."

In the meantime, You do what you can to keep your biyele (if you have one) on the road, or, if you are a war worker, perhaps your CCM, dealer anget you a new CCM. Biyele. You do that and we will make what biyeles we can, and at the same time plensy of war supplies to help John Bull "Einish the Joh"

How Much

Should Children Have?

Children need sugar. It helps provide energy for active little bodies. But too much sugar does more harm than good. Sweets between meals tend to dull children's appetite for the foods they

Satisfy their sweet tooth with these, instead :

Fresh fruits, fruit juices, dried fruits such as prunes, raisins, dates, figs, apricots. (50% to 75% of dried fruits are natural sugar.) They're much better for youngsters... and they help save sugar for Canada and our allies.

OFFICE OF THE CHIEF PLEBISCITE OFFICER

EVERY CANADIAN CITIZEN IS HEREBY ADVISED:

(1) THAT a Proclamation of the Governor in Council dated the 9th day of March, 1942, ordered a plebiacite to be taken in every electoral district in Canada on the question set out in the ballet papers to be used thereat in the following words and form:

Vote bymaking across thus, X, after the word Yes' or after the word No.

- (2) THAT the date fixed as polling day for the said plebiscite is Monday, the 27th day of April, 1942.
- (3) THAT polls will be open in each polling division from 8 o'clock a.m. until 8 o'clock p.m. (daylight saving time).
- (4) THAT new lists of voters have been specially prepared for the said plebiscite.
- (6) THAT the said lists are what may be termed "open lists" which means that, in either urban or rural polling divisions, any qualified voter whose name has been consitted from same may vote on polling day in his polling division upon taking the required eath and upon being vouched for on eath by a voter whose name appears on the list of voters for such polling division.
- (6) THAT National Registration Certificates are required to be produced by qualified urban voters whose names have been omitted from the lists of voters, and by those voters only, before being allowed to vote.
- (7) THAT advance polls will be opened in the same localities and on the same conditions as at the last General Election.
- (8) THAT, as a general rule, every person who has ordinarily resided in Canada during the last twelve months is entitled to vote at the said plebiscite if he is twenty-one years of age and a British subject.
- (9) THAT voters will be entitled to vote in the polling division in which they were ordinarily residing on the 30th day of March last.
- (10) THAT urban voters have been advised of the location of their polling stations on the notices left at their dwelling places by the enumerators.
- (11) THAT rural voters have been notified in the Notice to Voters posted up in the post offices, and should have been verbally advised by the rural enumerators of the location of their polling stations.
- (12) THAT, generally, polling stations for the said plebiscite will be established at or near the same premises as at the last General Election.
- (13) THAT arrangements are being made to collect the results of the plebiscite on the evening of polling day as is done at a General Election.
- (14) THAT every Canadian on active service or in training in any of His Majesty's forces or corps, within or without Canada, is entitled to vote at the plebiscite in advance of polling day by virtue of a special procedure provided.

Dated at Ottawa this 20th day of April, 1942.

TULES CASTONGUAY

Chief Plebiscite Officer.

CHEMISTRY HELPS TO WIN THE WAR

What Kind of Gun is This?

IT'S a spray gun wused to apply paint, vital protection for all metal surfaces in today's war equipment. Everything, from steel helmets to mighty ships, must have its painted shield against rust, corrosion and decay.

Paint and the painter are playing an important role in Canada's production of war machines. There must be paint for ships, shells and planes; paint for torpedoes, tanks and transports . . . and master workmen to apply them; camouflage paints, signal paints and other littleknown developments of the paint chemist.

C-I-L plants at Montreal, Toronto and Regins are working unceasingly to prevent any interruption in the flow of protective finishes for the Navy, Army, Air Force, while maintaining, so far as is compatible with war needs, the supply of necessary paint products for civilian use.

THE HOARDER"

Loyal citizens do not heard. They buy only for their immediate needs. They cheerfully adjust their standard of living, realizing that their country's needs must come first. They do not try to gain unfair advantages over their neighbours.

Are you a hoarder or a loyal citizen? Are you hampering Canada's war effort by unnecessary buying? Or are you co-operating to the best of your ability to save Canada from such horrors as Hong Kong?

If Canadians do their duty, there will be no more hoarding. Everyone will get a fair share of the goods available. More food can be sent to Great Britain. More raw materialsmore manpower-will be available for making guns, tanks, planes and other armaments to back up our armed forces.

In cases where it is advisable for you to buy in advance of your immediate requirements—such as your next season's coal supply—you will be succuraged to do so by direct statement from responsible philicials.

Morale in a mirror?.. YOU BET THERE IS!

You bet there's a lift in a looking glass! It's the kind of a lift we can all use - to whip into our kind of a lift we can all use — to whip into our jobs with renewed zat — to textle our problems, with fresh vigor. New clothes of bother quality possess the power to lift a man's spirit. And when their appearance underscores the skill of their talloring, the mirror you face reflects a lot more then a man with a risw suif. It shows you a man who stands just a bit straighter, whose smile is just a bit wider. Morele in a mirror? Come and see for yourself what a spirit-reviver a new Spring suit by Society Brand can be! Insurance Company Help Win The War!

HOW?

Be especially careful of grass fires, keep pipes clean and chimneys in good repair. Be very careful of cigarettes and pipe smoking at or near buildings.

Why do we ask this? We, as mutual companies of the Province of Ontario are putting on a compaign to midea fire lasses in 1924 by 25%. All monies saved in this way can be loaned to Canada to pay for the tonks and planes and gars which our fighting men must have. Also in the replacement of those buildings lost by fire. Labor and material must be used which is score and could be used in waste buildings lost by size.

EVERY POLICY HOLDER CAN HELP BY USING EVERY PRECAUTION AGAINST FIRE.

Peering down from 4,000 feet through the mist at the dim shape of a ship, observers in coastal patrol squadrons must know friend from foe. These models teach them the difference. Learning are Severants For Evid and Rob. Eduar, both from Hamilton.

On his first operational flight piloting a Beaufort torpedo-bomber, Sgt-Pilot C. By Briggs of Calgary has Squadron Leader R. R. Dennis of Ottawa beside him for advice. Their R.C.A.F Beaufort squadron has anni plenty of Nazi shipping to the bottom.

"There's the target." Two observers compare notes before their squadron of Boston bombers heads for Hun territory. Sgt. F. Brodeley, (L) and Sgt. M. Brandon, both Manitoba.

"All aboard the Wimpy". "Wimpy" is what these lads of aw R.C.A.F., bomber squadron call their big Wellingtons. Off for a bombing raid are (L. to R.) Sgt. A. D. Swansburg, and Sgt. W. D. Emberce, both Nova Sociis; P/O R. M. Graham, St. D. A. Blue, Ottawa.

"All clear?" This fighter pilot, Sgt. Lloyd Sinclair, of Paris, Ont., looks for the signal from his ground crew to take his Spitifer geoming into the air hunting Huns. Official R.Q.A.F. Phalographs

Toting his parachute the air gunner climbs aboard "Wimpy". In his turret he watches for Nazis while his observer in the nose drops bombs. He's Sgt. B. A. Angers of Montreal,

YOUR SCRAP RUBBER

is now a vital war material

Enemy action in the Far East has caused such an acute shortage of rubber that our whole war effort is in serious danger. Canada and her Allies must have rubber; quickly, for the armed forces, for factories, for ships. The Japanese control our source of crude rubber imports—the only other quickly available supply is old scrap rubber, which can be reclaimed. Every citizen in Canada must do his part in collecting all the scrap rubber in the country and turning it over to the Government for war purposes. Here is how to do it.

THIS IS AN URGENT APPEAL FOR YOUR HELP

Answers The shortage of rubber is so grave that any citizen hoarding rubber or using it unnecess-arily is committing an act of disloyalty. It is now illegal to destroy any rubber article.

Question: Of what use is reclaimed rubber? sewers Old rubber is processed so that the rub-content is reclaimed. This reclaimed rubber is I in the manufacture of essential articles for our effort, thus replacing crude rubber.

Answers Fifty Million Pounds. This is a large quantity, but it MUST be found. Every old piece of rubber in Canada, no matter how small, is needed, QUICKLY.

Question: Should I turn in any usable rubb articles as well as worn out once?

Arnswers Absolutely not! By no means discard any-thing that is still useful and that might have to be replaced. On the other hand, rubber tires used as boat bumpers, swings, etc.; ahould be turned in for

Question: What kind of scrap rubber is needed? Answers Every all-rubber or part-rubber article must be salvaged. Here are a few of the articles you must turn in:

Old Tires of every kind Rubbers
Old Liner Tubes
Rubber Boots, Hats, Coats, Aprons, Pants
Gloves, Tubing, Matting, Toys
Sport Shoes (creps soles are especially good)
Garden Blose Hot Water Bottles Shair Trees
Eathing Caps and many other articles

Question: What happens to the scrap rubi

collected?
Answer? The scrap is sorted, baled and assembled into carload lots and is then purchased by the Government at fixed prices throughout Canada. The Government pays forwarding transportation charges on these certoid lots, and is responsible for their allocation. You may be sure that every pound will be used directly or indirectly in the war effort.

Question: How do I go about saving scrap rubber?

Answer; Start hunting for it TODAY, Clean out your cellars, attics, garages and sheds right away. You will find more rubber articles than you expect. Start them all on their way to the battlefront.

HOW DO I TURN IN MY SCRAP RUBBER?

The school boys and girls of Canada are being organized, through the school authorities, to act as Official Collectors of Scrap Rubber. The school nearest you is, therefore, your best Collection Depot. You may dispose of your scrap rubber in any one of the following four ways:

Give it to your local National Salvage Committee.
 Leave it with any Service Station or Tire Dealer where you see the sign: "Voluntary Scrap Rubber Receiving Depot."

When you gather up your ecrap rubber and dispose of it by one of these methods, it will be used by the Government for Canada's War Effort. Do it NOW!
